9 Bennetts Crossing	95043

Bennetts Crossing, proposed intersection improvements

NJDOT Traffic Engineering identified this location due to its poor geometry. Route 9 and CR 626 (Seashore Road) are in close proximity and are connected by Bennetts Crossing, a local road, for a distance of approximately 100 feet. The existing intersection is unsignalized. Problems arise when larger vehicles, including school buses, and/or passenger vehicles queue into the lane of traffic along Route 9 and Seashore Road. An interim improvement will be recommended until a long-term study of the railroad crossings in lower Cape May County can be initiated.

Intersection at Crest Haven Road (CR 609), operational improvements

This project will provide intersection improvements, including left-turn lanes and signalization. Crest Haven Road (County Route 609) serves both as the entrance to the County Park and Zoo and as a connector route from Route 9 to the Garden State Parkway. Heavy traffic volumes during the summer months cause this signalized intersection to fail. This project was designed to be bicycle/pedestrian compatible.

Interchange at Garden State Parkway Exit 127A (southbound), drainage improvement
 Flooding of Route 9 near the Garden State Parkway occurs in heavy rainfall events. In very intense storms, flooding can extend over the entire main pavement. In addition to the flooding problem, roadway icing causes extremely hazardous driving conditions at this location. Drainage improvements on Route 9 will alleviate the flooding during heavy rain.
